Return to School

iPAD CARE

As we plan our return to school, there are some general reminders that families should consider when transporting devices to and from school.

Students are responsible for the general care of the iPad the district has provided them. If your family opted out of the district device, your child is expected to bring their personal device to school every day for face to face learning.

General Expectations

- Students are expected to bring their devices fully charged and prepared for learning.
- It is advised that students bring the power cord/charger to school each day to ensure the device is usable the entire school day.

General Precautions

- No food or drink is allowed next to a district iPad, and should not be consumed while using the iPad.
- Chargers and removable storage devices should be carefully inserted and removed.
- iPads must never be placed in unlocked cars or lockers or any unsupervised area or leave unattended.

Transporting iPads

Students should carry their iPad in a laptop bag or backpack to and from school.

- iPads must remain in district provided cases at all times
- iPad should be turned off during transportation
- Power cables should be removed and stored in a separate compartment
- Do not overload bags such that books and supplies weigh down on the screen.
- Never pick up or carry the computer by its screen.
- Always close and disconnect all cords before carrying.

Taking Care of the iPad, Screen and Keyboard

The screens are sensitive and should be treated gently.

- Do not apply undue pressure to the screen.
- Do not poke or scratch the screen
- Clean the screen with a soft, dry cloth.
- Do not place any items (charger, pencils, scissors, etc.) in the same storage compartment as the iPad.
- Do not hit, drop or throw the iPad bag and or backpack (with your iPad inside) against lockers, walls, etc. as it could damage the screen.
- Remember to carefully set your bag down with the iPad inside.

Damage or Loss at School

- Students are expected to report any loss or damage to their device immediately to the teacher/principal.
- Damage caused by another student (non-owner) must be immediately reported to the teacher/principal.

Cleaning iPad

If the student needs to clean the iPad, it can be completed by using a Clorox type Wipe (wrung out) and wipe down case and screen.
